2018 Pavement Overlay Improvements

Construction Start Date: October, 11, 2018 Construction End Date: October 19 (estimated)

The City contracts with King County to perform pavement overlays as part of a City wide program. This year it has been difficult to schedule paving, partly because backlogs created by the Operating Engineers Union (Seattle Crane workers) strike earlier this year. At this time, King County is scheduling 2-3 days of paving operations between October 10th and October 19th, depending on appropriate weather, on the following street in this neighborhood:

- 235th Way SE
- SE 253Place
- SE 252nd Court
- SE 251st Place

King County is making every attempt to accomplish this paving work this year. However, weather and paving crew availability may require paving effort to delay until next spring if the paving season window is missed.

If you have any specific questions about the project please contact Tom Bowen, City Construction Inspector, at (206) 391-8160. Thank you for your patience while the City completes these improvements.
